Professional Summary:

Enthusiastic Computer Engineering professional with a strong foundation in Data Analytics, AI/ML, and Web Development. Experienced in working on data-driven and technology-focused projects that involve analysis, problem-solving, and collaboration. Demonstrates the ability to translate technical concepts into practical solutions while contributing effectively within team environments.

Education:

Bachelor of Technology (B.Tech) – Computer Science & Engineering (Artificial Intelligence)
Nutan College of Engineering & Research, Pune
Graduation: 2027

Internship:

Data Science & ML Intern

UniConverge Technologies Pvt.Ltd.

Remote
2025

- Gained practical knowledge of data science and machine learning concepts through guided training.
- Worked on data preprocessing, exploratory data analysis, and basic model building.
- Applied analytical thinking to solve structured problem statements using real datasets.

VOIS for Tech Intern

Conversational Data Analytics
with LLMs

Remote
2025

- Learned the fundamentals of conversational data analytics using Large Language Models (LLMs).
- Explored real-world use cases of AI-driven conversational systems for business insights.
- Developed understanding of prompt design, data interpretation, and AI-powered analytics workflows.

Foundations of Artificial Intelligence Intern

Microsoft in collaboration with Edunet Foundation & AICTE

Remote
Apr 2025 – May 2025

- Completed a structured 4-week internship focused on AI fundamentals and real-world applications.
- Gained hands-on exposure to core AI concepts, data analysis, and ethical AI practices.
- Worked on practical exercises and mini-projects aligned with industry use cases.

Projects:

- **AI Powered Global Talent Research & Recommendation Engine** - ML-based system to analyze profiles and recommend suitable roles using feature analysis.
- **ML to Talk Using AI (TE Connectivity Company – Ongoing)** - Working on AI-driven interaction using ML models and data processing workflows.
- **Airbnb Hotel Booking Analysis** - Performed data cleaning, EDA, and visualization to extract pricing and availability insights.
- **Netflix Data Analysis** - Analyzed content trends by genre, year, and region using Python.
- **Data Analysis Platform** – Data cleaning, visualization, and trend analysis using Python.
- **Web Development** – Built interactive websites using HTML, CSS, JS.

Skills:

- Programming: Python, SQL, Java (basic) | • Web: HTML, CSS, JS |Tools: Excel, Jupyter,
- Data & Analytics: Data Cleaning, EDA, Visualization, CSV handling
- Tools & Platforms: Linux (basic), Jupyter Notebook, Excel, GitHub
- Concepts: AI/ML Fundamentals, Data Analytics, Problem Solving

Certifications

- Foundations of AI – Microsoft, Edunet Foundation, AICTE
- VOIS for Tech: Conversational Data Analytics with LLMs – Vodafone Idea Foundation
- Introduction to Data Analytics – Simplilearn
- AI for Beginners – HP LIFE / HP Foundation
- Green Skills & Artificial Intelligence – Edunet Foundation, AICTE, Shell
- Nestlé E-Learning 2025 – Sustainability

Achievements

- Volunteered at CodeMent National Hackathon
- Internshala Student Partner (ISP 52) .
- Volunteered in PCET Training and Placement drives.
